

Announcement

Four New Pemko Half Saddle Profiles Now Available

Four half saddle profiles have been added to the Pemko threshold product portfolio. These new profiles include two offset half saddles and two flat half saddles. Each of these new profiles can be joined with any other half saddle from its dimension group. For example, the 766_ profile is compatible with any existing 1/4" high Pemko half saddles while the 566_ profile will work with existing 1/2" high half saddles. This enables the creation of a full saddle or a full offset saddle at the width of the customer's choosing and the best solution to suit their needs.

The new Pemko half saddle profiles are available in an aluminum base metal with either a mill finish or a dark bronze anodized finish.

Technical drawings, cut sheets, product specs, and additional information is available on the Pemko website. For additional information contact your local sales representative, ASSA ABLOY Door Security Solutions Representative, or call 800-824-3018.
